The performance data quoted represents past performance. Past performance does not guarantee future results. Current performance may be lower or higher than the performance data quoted. The investment return and principle value of an investment will fluctuate so that an investor's shares, when sold or redeemed, may be worth more or less than the original cost. Returns less than one year are not annualized. For the most recent month-end performance, please call (855) 561-5728. You cannot invest directly in and index. Shares are bought and sold at market price (closing price), not net asset value (NAV), and are not individually redeemed from the Fund. Investing involves risk, including possible loss of principal. Esports gaming companies face intense competition, both domestically and internationally, may have products that face rapid obsolescence, and are heavily dependent on the protection of patent and intellectual property rights. Such factors may adversely affect the profitability and value of video gaming companies. Investments made in small and mid-capitalization companies may be more volatile and less liquid due to limited resources or product lines and more sensitive to economic factors. Fund investments will be concentrated in an industry or group of industries, and the value of Fund shares may risk and fall more than diversified funds. Foreign investing involves social and political instability, market illiquidity, exchange-rate fluctuation, high volatility and limited regulation risks. Emerging markets involve different and greater risks, as they are smaller, less liquid and more volatile than more developed countries. Depository Receipts involve risks similar to those associated investments in foreign securities, but may not provide a return that corresponds precisely with that of the underlying shares. Please see the prospectus for details of these and other risks.
